(04)

Read the passage carefully then answer the question:

Walking is a pleasure. When we are in a vehicle, our attention is fixed on the road. There is no time to spare for the things on the either side of the road. A walker can, however, enjoy the sights on either side. If he so likes, he can change his speed. He can walk slowly when there is much beauty around. By doing so, he can admire and connect with the nature. He can go fast when he wants his walking to be an exercise for his limbs as it regulates our blood circulation.

Walking also gives us a feeling of freshness as well. However, no young person should walk thinking that it is an exercise. It will kill all the pleasure. Moreover, there are many other exercises that are good for health. Walking should be made a habit for enjoyment. Walking offers significant health benefits, including improved cardiovascular health, weight management, and mental well-being. It's a simple, accessible, and low-impact exercise suitable for all ages and fitness levels. Walking regularly will work your heart — notably taking down your cholesterol numbers. High cholesterol is a risk factor for heart disease too.

One should feel relaxed and not tired after a good walk. We should walk only when the weather is fine. We should avoid walking when it is hot or misty.
