### SECTION-C

(2×3=6)

7. Write a note on China by stating the mixed relationship with India. 3

Ans- India and China are two very big countries in Asia. They share a long border high up in the mountains.

Their relationship is a little mixed, kind of like two friends who sometimes play well together and sometimes argue. Times they get along:

They both want their countries to be strong and successful. They trade a lot of toys, electronics, and other goods with each other. Leaders from both countries meet sometimes to talk and try to work out problems.

8. Explain the role of industries in our life. 3

Ans- Industries play an important role in the economic development of any nation without industries, economic development is impossible.

The various favourable factors present in the country for the development of industries are: The country is rich in natural resources, such as minerals, forests, fisheries, etc. Industries provide machinery like tractors and modern inputs to the agricultural sector.

It improves the working and live-style of the farmers.

Industries also provides arms and ammunition for the defence of a country, without these the country will become extremely vulnerable

OR

Imagine you were in the Ancient period with other ancient people. Throw a light on the lifestyle of those people.

#### SECTION-D

(2×4=8 )

Case Study:-

9. Greenfield is known for its small toy-making factory. The factory makes wooden toys like cars, animals, and puzzles. The wood is brought from nearby villages. Around 20 workers paint, polish, and pack the toys. These toys are sold in local shops and also sent to nearby towns. The toy factory helps many families earn a living and makes Greenfield a happy place for children who love toys.

Questions:-

1. What does the toy factory in Greenfield make?

1

Ans- wooden toys like cars, animals, and puzzles.
